

A SELF-DRIVING LAB FOR THE ACCELERATED DISCOVERY OF ORGANIC SOLID-STATE LASERS

ALÁN ASPURU-GUZIŁ, *Department of Chemistry, University of Toronto, Toronto, Canada.*

In this talk, I will discuss our group's efforts toward the development of solid-state organic laser candidate emitting compounds. We employ automated systems to synthesize and characterize them, as well as make devices out of them. This is part of a large international collaboration that can be thought of as a delocalized laboratory.
